Description

Outstanding design in luxury fast cruising.

Contemporary and classic elements are intelligently blended into the clean, streamlined and extremely elegant profile of the Sly 54.

Understated in excellence, the Sly 54 is the new benchmark in fast cruising.

The generous sail plan, a light displacement with efficient appendages all offer high performance and great efficiency in the varying New Zealand conditions at any pace.

Style and Versatility

The Sly 54 fully compliments the nautical traditions demanded in a sailboat in terms of design and performance.

A large cockpit can host your family and friends due to its extensive free surface area. The astern double steering and long bench seats make heaps of space for cruising or racing with a full crew.

Even the slightest breeze moves the Sly 54 while allowing an easy and safe handling by either sails or engine.

The hull profile is streamlined and elegant while balanced by a low, narrow coach roof with long side windows... a signature style feature of every Sly.

The rare attention to detail on deck and below aim to provide the best possible cruising experience for the boat owner and crew.

Sly 54 Performance Design Features

- The mast, available in carbon fibre, has double aft swept spreaders 20 degrees without structural rigging and incorporated mast jack
- The optional furling genoa is inbuilt below deck
- Rigging and forestay are intermittent rod while the Kevlar backstay is PVC coated
- Rudder shaft is from carbon fibre
- Hull and deck are in a recessed mould sandwich with glass and carbon fibre surfacing, PVC core and epoxy-Vinylester resin
- Moulding is performed via infusion
- Deck is glued to the hull via the vacuum process
